SUMMARY

3dtagz provides cloud digital mockup and technical documentation software. Use your existing 3d models for design reviews, assembly instructions, inspection job aids, intuitive maintenance & repair procedures, issue tracking... all from the cloud anytime, anywhere, on any device.

DIFFERENTIATION

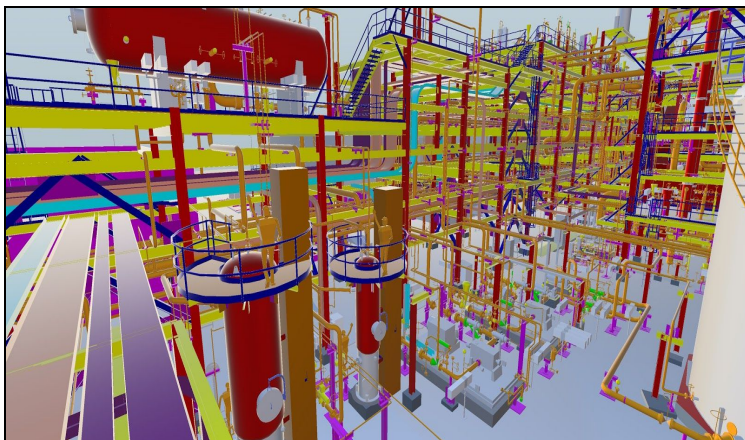

3dtagz uniquely provides a complete cloud system for true interactive 3d database communication, not outdated pseudo-3d file-based website publication like our major competitor.

Authoring is WYSIWYG, not a complex linking of multiple files. The document reader gets a password-protected full 3d environment for an order of magnitude better communication.

EASIER FASTER BETTER

WHO WE ARE

Our founders and engineers bring a combined 100+ years experience in complex digital mockup and technical publication systems for major aerospace and automotive companies.

PRODUCTS

3dtagz Reader, \$250/year
